

Research Strategy 2023-2028

Our Vision:
No life limited by gluten
Our Goal:
A world without coeliac disease

Research Priorities

Risk factors and triggers

Better support for healthcare professionals

Gluten related neurological conditions

Less invasive diagnostics

Associated conditions

Management and wellbeing

Improved food safety

A 'cure' for coeliac disease

Preventing complications

Refractory coeliac disease

Strong governance to AMRC* standards

1

Research Priorities

chosen by people living with coeliac disease, alongside those who care for them and healthcare professionals

2

Funding

awarding grants, diversifying and pooling funding

3

Supporting Researchers

with grant applications, resources, funding and education

4

Collaborations

with patient associations, industry, healthcare professionals and researchers

5

Patient & Public Involvement & Engagement

PPIE – involving, engaging and supporting people living with coeliac disease throughout all stages of research

6

Translation

of research to the benefit of the coeliac community

7

Dissemination

supporting the dissemination of research to all stakeholders; the coeliac community, researchers, healthcare professionals and industry

8

Impact

continuously monitoring and evaluating the impact of research

Coeliac UK, 3rd Floor Apollo Centre,
Desborough Road,
High Wycombe, Bucks, HP11 2QW

T: 01494 437 278 F: 01494 474 349 www.coeliac.org.uk

Outcomes

- Research remains relevant to the coeliac community
- Increase funding in coeliac disease research
- World leading experts and early career researchers choose to study coeliac disease
- Collaborations established nationally and internationally
- Collaborations established across disciplines, diseases and different key stakeholders
- PPIE always implemented effectively
- Evidence translated and used to advocate for the benefit of the coeliac community
- Key stakeholders receive regular, timely updates of research about coeliac disease

Donate

As a not-for-profit organisation we rely on donations to continue to fund vital research.
